

Suite

Chair + Ottoman

The Suite Chair's elegant shape and defined curves offer comfort and style.

Inspired by the musical term *Suite de Danses*, meaning "a suite of dances", the chair spins lightly and pairs with the Suite Ottoman.

Customize your Suite

1. with over 130 fabrics and leathers;

Due to its organic curves, select covers are not available, such as Seoul, Coachella, Bali; Always reference the not recommended list live on SharePoint.

2. with two elevated base options;

Polished or Anthracite

Construction Comparison

The Ottoman is built with an OSB/soft wood combo frame, with foam padding, and 75%/25% feather topper.

The Suite Ottoman construction is identical for both Series Numbers and has not changed.

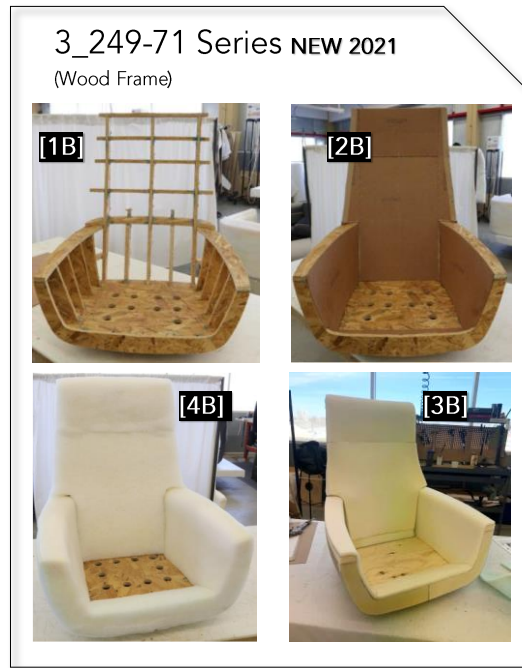

Why The Change?

We initially switched from the EPS shell to a wood frame due to supplier challenges; This allowed us to fulfill current open orders of the Suite Chair. The frame and process turned out so well that it is now approved for permanent in-house production moving forward.

Key Differences?

Weight: There is a total product weight difference of 23.7lbs.

Warranty: The Classic EPS core held a 10-year frame warranty while the wood frame holds a lifetime warranty (25-years)

The final seating experience between the two series is near identical despite their cores being so different:

- The OSB Wood Frame comes from our local Palliser frame shop [1B] and Masonite board is applied here at EQ3 [2B] before the Foam Padding Application [3B].
 - The EPS core [1A] was shipped to Winnipeg complete and was ready for Foam Padding Application right away [2A].
 - By the time each frame reaches the final Dacron Padded Cover [3A + 4B], you can hardly tell the different.
- The design uses Viscos foam ("memory foam") for the inside back and headrest, and 75% feather/25% fiber plush topper in the seat cushion.
- The 'new' wood frame has been upgraded to a 2.2lb. firm seat core under the plush topper. Note the 'original' EPS Series used a 1.8lb. firm seat core.

In Panama Natural (2018)

In Fino Saddle (2018)

additional seams are to be expected on Leather Custom Options to accommodate the natural size of hides
